# MARS EXPRESS

Mid-90s Britain. Thatcher in the rearview. Cigarettes and Alcohol. Optimism. Confidence. It was all coming home: football, art, music, politics and... science? Well, yes. Professor Colin Pillinger and his wife Professor Judith Pillinger - both planetary scientists - set out to build the Beagle 2 probe to go to Mars in search of organic life. With his mutton chops and strong West Country accent, Colin was an unlikely scientific hero. He and Judith owned an idyllic farm in the English countryside where they raised dairy cattle. Obsessed with the wonders of the universe, they were also deeply rooted in the earth and the messy joys of life as we know it. With no prior experience of building a space craft, they pulled together a team of misfits who took on NASA and almost won.

An extraordinary true story, ***Mars Express*** is the debut feature of Mackenzie Crook, creator and director of hit British series ***Detectorists*** and ***Small Prophets***, and star of ***The Office*** and the ***Pirates of the Caribbean*** franchise.
